

Revive - Design Document

Introduction

Revive is a Focus App based on taking care of endangered or extinct species. In Revive, you can take care of a species from 0 to 1, starting with an egg. For your species to thrive, you need to do anything in a focused way----such as studying, working, or other activities, which is the core of Revive.

In Revive, you can discover all kinds of endangered or extinct species and revive them with the power of focus. During this journey, you will improve your focus skills, increase your knowledge of species, and finally become the master of revive.

Background Story

The path of life is a circle; the scene's end and beginning are the same. The extinction of a species will continue life in another way until it is explored...by you.

Target User

- **Students and anyone who needs to focus**
 - The main feature of this app is Focus. which promotes focused learning through games. People will be more willing to focus on their studies or work.
- **Animal lover**
 - The theme of this app is centered around endangered or extinct species. Perfectly suited to the interests of animal lovers.

Features

Focus

- The focus mechanism detects if the user is leaving the application. This prevents the user from doing other things.
- For the timer, users are free to set the time they want to focus on.
- There are three kinds of focus approaches: hatching, training and exploring.

- Hatching:
 - Hatching eggs through focus.
 - Eggs are randomly assigned to the user, and eggs from different types of Species take different amounts of time to hatch.
 - Users can choose their own focus time, which is used to reduce the amount of time remaining for the egg to hatch. (In other words, egg hatching doesn't need to be done all at once, it can be done by multiple Focuses)
- Training:
 - Training users' own species through focus.
 - The longer users focus, the higher EXP users' species gain.
- Exploring:
 - Exploring through focus.
 - Users can select a time period for the focus. The exact time is random in the selected time period.
 - The longer users focus, the higher probability of getting rare items.

Backyard

- a. Users can check their species in the Species List. Species List contains information about each species.
 - Name
 - Date of birth
 - Level
 - Sex
- b. Users can take care of their species by feeding them. The items gains by exploring.

Analysis

- a. Users can view the history of focus records as well as time distribution graphs.
- b. Users can categorize the view by action and time span.

Cloud Sync

- a. Cloud Sync will automatically store user information.
- b. The users' data will be stored in their iCloud.

Setting

a. Focus

- Keep Screen On
 - Users can set it on if you want.

b. Notification

- Notification
 - Notification switch helps users turn on/off the notification.
- Reminder
 - Reminder will remind users to start focusing by sending the notification.
 - Users can set the reminder time in this field.

Notification

If the time set by users is reached, the user will be alerted via notification.

Era	19th century	

Area	Sky (1.1~1.3)
Intro	Will I be able to fly one day? / I have no idea why everyone thinks I'm delicious.

6. Golden Toad

ID	011	Graphic
Species	Amphibian	Egg:
Name	Golden Toad	
Rarity	Rare (R)	
Hatch Time	30 min	
Evolve At	None	Golden Toad:
Lifespan	12 years	
Height	0.04 – 0.06 m	
Weight	0.02 – 0.04 kg	
Type	Carnivore (2)	
Era	19th century	
Area	Rainforest (1.3)	
Intro	Be aware of FUNGUS!	

7. Triceratops

ID	012, 013	Graphic
Species	Reptiles	Egg:
Name	Triceratops	
Rarity	Rare (R)	

Hatch Time	30 min	
Evolve At	35	
Lifespan	80 – 90 years	
Height	2.5 – 3.1 m	Triceratops:

Era	Cretaceous	
Area	Wetland (1.1~1.3)	
Intro	I will have the strongest power in future! / I love Jackson's chameleon because we all have three horns.	

8. Pterosaur

ID	014, 015	Graphic
Species	Reptiles	Egg:
Name	Pterosaur	
Rarity	Rare (R)	
Hatch Time	30 min	
Evolve At	35	
Lifespan	25 years	Pterosaur:
Height	0.8 – 1.2 m	
Weight	2 – 6 kg	
Type	Carnivore (2)	
Era	Mesozoic	
Area	Sky (1.1~1.3)	
Intro		

I do not know the function of my hands. / Let me repeat it one more time:
Pterosaur is NOT a dinosaur.

9. Quagga

ID	016, 017	Graphic
Species	Mammals	Egg:
Name	Quagga	
Rarity	Rare (R)	
Hatch Time	30 min	
Evolve At	35	Quagga:
Lifespan	22 years	
Height	1.2 – 1.4 m

Era	18th century	
Area	Sky (1.1~1.3)	
Intro	I'm not a penguin, I can fly. / Proud of letting bird species extinction be noticed by scientists.	

27. Yunnan Lake Newt

ID	051	Graphic
Species	Amphibian	Egg:
Name	Yunnan Lake Newt	
Rarity	Rare (R)	
Hatch Time	30 min	
Evolve At	None	Yunnan Lake Newt:
Lifespan	– years	
Height	0.1 – 0.2 m	
Weight	0.1 – 0.3 kg	
Type	Carnivore (2)	
Era	20th century	

Area	Wetland (1.3)
Intro	Endemic species means I was only in Yunnan Province.

28. Ainsworth's Salamander

ID	052	Graphic
Species	Amphibian	Egg:
Name	Ainsworth's Salamander	
Rarity	Rare (R)	
Hatch Time	30 min	
Evolve At	None	Ainsworth's Salamander:
Lifespan	20 years	
Height	0.1 – 0.2 m	
Weight	0.1 – 0.3 kg	
Type	Carnivore (2)	
Era	20th century	
Area	Rainforest (1.3)	
Intro	Lungless salamander uses skin for respiration.	

29. Kronosaurus

ID	053, 054	Graphic
Species	Reptile	Egg:
Name	Kronosaurus	

Rarity	Super Rare (SR)
Hatch Time	120 min
Evolve At	Lvl 35
Lifespan	35 – 50 years
Height	7 – 10 m
Weight	9000 – 12000 kg
